

Indigo Rose Tomatoes (Heirloom)

Growth Habit: Indeterminate, reaching up to 4 to 6 feet in height. Requires a long growing season (70 to 90 days).

Best Uses: Fresh eating, salads, and cooking. Known for their unique dark color, antioxidant-rich skin, and complex flavor, they add visual appeal and a sweet, slightly plum-like taste to dishes.

Growing Information:

- Full sun
- Well-draining soil with a pH of 6.0 to 6.8
- Start seeds indoors 6 to 8 weeks before the last frost
- Transplant seedlings outdoors after hardening off
- Space plants 24 to 36 inches apart
- Provide strong support for vines (e.g., tomato cages or trellises)
- Harvest when the fruit has fully darkened and slightly softened

Maintenance Information:

- Prune suckers and lower leaves to encourage fruit production and maintain plant structure
- Water consistently, providing 1 to 2 inches of water per week
- Fertilize with a balanced tomato fertilizer every 3 to 4 weeks

Pest Management:

- Monitor for common tomato pests like aphids, whiteflies, and spider mites
- Watch for signs of fungal diseases like early blight and late blight, and remove infected leaves promptly

Companion Plants:

- Good companion plants for Indigo Rose tomatoes include basil, marigolds, and nasturtiums, which help repel pests and promote beneficial insects.
- Avoid planting tomatoes near fennel, potatoes, or other members of the nightshade family to prevent disease and pests from spreading.
