

San Marzano Tomatoes (Hybrid)

Growth Habit: Indeterminate, tall and vining

Best Uses: Sauces, pastes, canning, and cooking

Growing Information:

- Full sun
- Well-draining, nutrient-rich soil with a pH of 6.0 to 6.8
- Start seeds indoors 6 to 8 weeks before the last frost
- Transplant seedlings outdoors after hardening off
- Space plants 24 to 36 inches apart
- Provide support using stakes, cages, or trellises

Maintenance Information:

- Prune suckers and lower leaves to encourage fruit production and maintain plant structure
- Water consistently, providing 1 to 2 inches of water per week
- Fertilize with a balanced tomato fertilizer every 3 to 4 weeks

Pest Management:

- Monitor for common tomato pests like aphids, whiteflies, and spider mites
- Check for signs of fungal diseases like early blight or late blight, and remove infected leaves promptly

Companion Plants:

- Good companion plants for San Marzano tomatoes include basil, marigolds, and nasturtiums, which help repel pests
- Avoid planting tomatoes near fennel, potatoes, or other members of the nightshade family
